

PHOTOGRAPHS OF SOME TREES:  
taken at site meeting 2020-06-05 by TERRA+

Existing dead tree to be retained, to be made safe, to later detail (tree 5).

3 x existing *Brongium porculorum* are large mature trees, seen from the entrance driveway, to be retained (trees 2, 3, 4).

TREES TO BE RETAINED

Single *Psidium guajava* to be retained (tree 27).

An example of dead tree to be felled.

TREES TO BE FELLED

GENERAL NOTES:

Trees are of an immense environmental and aesthetic value. This drawing is a baseline layout of the existing trees in order to describe the surveyed on site tree species. It indicates existing significant trees that are to be retained and protected, and it assists in development of management strategy and of proposal of future tree and other planting.

The determination of the trees to be retained and of the trees to be felled was based on the following criteria:  
Protected species  
Indigenous species / non-indigenous species  
Good shape (structure of branches, balanced crown)  
Good health and condition (stem and crown diameters, presence of structural decay or defects)  
Maturity / age  
Height  
Position  
Character and space-making qualities  
Space programme and future users' requirements  
Significance

TERRA+ Landscape Architects Tree Management Document includes the following:

Tree Management During Construction Stage  
Tree Pruning and Health Monitoring Methodology

All *Melia azadirach* trees are to be felled.

Existing cactus to be removed (tree 9).

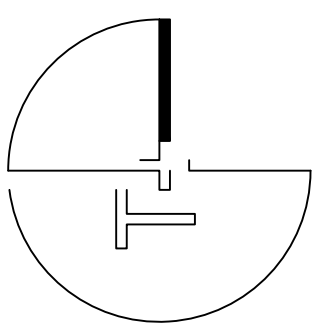

*Opuntia humifusa* to be removed (tree 31).

Trees, which grew inside or too close to the existing cottages, are to be felled.

This drawing must not be scaled.  
Dimensions and finished levels indicated may only be used.  
All levels, dimensions and specifications are to be verified on site and checked against the drawings prior to commencement of any works.  
Any discrepancies must be reported to the landscape architect.
